

**The other key workers in care homes: implications of including ancillary staff in social care workforce strategies and practices relating to COVID-19 recovery**

The Policy Research Unit in Health and Social Care Workforce is seeking involvement in a research project.

The study will explore the workplace experiences of cleaners, housekeeping and catering staff working in care homes during the pandemic. The aim of this study is to shed light on changes in their work and their support needs.

The research team is seeking to interview people that have worked or lived in a care home during the pandemic or are a family member or a friend of a resident.
