

# Do Once and Share Single Assessment Process

## The Single Assessment Process: Policy, Practice, Next Steps

### Programme

- 10.30 Introduction to day by Chair, Beverly Castleton
- 10.35 Keynote Presentation and questions, Glenys Jones
- 11.05 Introduction to work of DOaS and objectives of day, Beverly Castleton
- 11.10 Presentation by Vision and Pathway sub-group and questions, Keith Strahan
- 11.30 Presentation by E-SAP implementation sub-group and questions, David McNally
- 11.50 Break
- 12.00 Presentation by SAP community sub-group and questions, Gillian Crosby
- 12.20 Presentation by SAP and complex assessments sub-group and questions, Richard Carthew
- 12.40 Panel - Questions and Answers
- 12.55 Introduction to workshops Beverly Castleton
- 13.00 Lunch, networking and viewing CPA SAP website
- 14.00 Workshops
- 15.00 Brief reports from each workshop
- 15.30 Chair's closing remarks. Beverly Castleton

## What is Do Once And Share (DOAS)?

- The overall programme is being managed within NHS Connecting for Health and is part of the Knowledge, Process and Safety Directorate headed by Sir Muir Gray.
- The aim is to enable clinicians and other care providers with an interest in a particular area/condition to **share knowledge, skills and experience**.
- Duplication will then be minimised and a national approach to care can feed into the implementation of the National Programme.
- This involves harnessing the contributions clinicians/practitioners are already making within the National Programme at national and cluster levels.

## What is Do Once and Share? (DOAS)

- To achieve this, there are a set of DOAS projects, being delivered by Action Teams.
- Over 43 DOAS projects have been in action in during the latter half of 2005, more coming on stream in 2006.
- The project timeframe for the first DOAS projects is a period of 6 months.
- All will complete their agreed scope of work by end of March 2006 (possibility of further funding after).

## Do Once and Share - SAP

- ▶ The SAP DOAS project is seen to be important, not only because it links to social care but because there are multiple boundaries – **one organisation often having to deal with many others.**
- ▶ Brings the ideas behind SAP to the wider medical profession in a way which has not happened before.
- ▶ Linked to the Championing SAP project.
- ▶ Steering Group made up of members of the SAP Action Team, representatives from the 5 National Programme Clusters (including Social Care) and relevant others e.g. Centre for Policy on Ageing.
- ▶ 4 sub-groups taking forward the main objectives of the project which were seen as outstanding issues by the SAP Action Team.

## Do Once and Share SAP – Scope of Work

1. Bring together the national SAP community to develop a **vision and common care pathway for SAP** to be used to inform the development of health and social care systems.
2. Show the lessons learnt from **electronic SAP implementation** so far as a step towards developing a robust national programme.
3. Help to build the wider **national SAP community** around the Centre for Policy on Ageing SAP web site.
4. Produce a clearer **definition for complex, comprehensive assessment** (including the links between SAP and LTC) so that the system for delivery of this very complex level of care is better understood.
